

Please provide us with:

- 1 working 20 amp outlet w/in 300' of setup location or 2 15 amp outlets on different breakers w/in 150'. We bring cord. Tip: use a phone charger to make sure outlets work.
- Working faucet or other way to fill buckets. We bring a water key.
- 2 outdoor rugs/mats to cover our ramp
- 2 chairs
- Suitable parking surface (pavement, grass, coarse gravel). No dirt, no mulch, no sand, no fine gravel. We can drive over curbs. We are not liable for sprinkler or surface damage.

Cave Dimensions: total height: 10'3" trailer weight: 7500 pounds

Vertical caving tower: a 12' tall freestanding A-frame with a footprint of 7' x 10'. We use it to teach kids about pulleys. In windy conditions, we secure the tower with either 16" metal stakes driven into the ground or with water buckets. We bring stakes and buckets. Requires flat ground. Can be set up on most surfaces, including pavement, grass, and dirt.
